

## ELBIT OUT OF SWEDEN!

## ELBIT OUT OF SWEDEN!

### **What is Elbit Systems?**

Elbit Systems is Israel's largest arms manufacturer. It produces, among other things, drones and surveillance technology that is marketed as 'battle-tested' (which in practice means it has been used to oppress Palestinians) and then sold on to countries such as the Philippines, Myanmar and the US.

### **What are they doing in Sweden?**

Swedish purchasing of Israeli war materiel has increased significantly in recent years. In 2021, a subsidiary of Elbit Systems was opened in Sweden, which now has offices at Långfilsgatan 5 in Gothenburg. In October 2023 - amidst Israel's ongoing genocide of Palestinians - Sweden signed a ten-year contract worth SEK 1.7 billion with Elbit.

### **Why should they be shut down?**

By doing business with Elbit, Sweden is complicit in genocide. We will not stand by and watch it happen. Shutting them down would be a major blow to Israel's apartheid system and to the global fight against war and militarization.

### **What can I do?**

There are many ways to join the campaign! Contact politicians and question Swedish business, call Wallenstam and ask why they accept blood money from their tenants, gather your friends and organize a blockade outside the office - there are a thousand ways to protest, and together we will achieve the goal: Elbit out of Sweden!
